DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 3, 11, and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Kuriyama (JP11051391), which shows all of the claimed limitations. Kuriyama shows cigarette lighter 1 including, among other things, a reservoir for storing fuel 17, a head 6 formed on the reservoir, a valve 7a for releasing the fuel from the reservoir, a nozzle 7b put in the head for spraying the fuel from the valve, an ignition device 8 for igniting the fuel sprayed from the nozzle, a cover 4 for covering the head and a visual alarm 23 for providing only one round of a visual message every time the cover is lifted, a collar 6, wherein the alarm includes a switch 30 for contact with the cover when the cover is lifted (see at least fig. 5), further including a lever 15a for controlling the valve, a container 3 integrated with the reservoir, wherein the ignition device is put in the container (see at least fig. 1) and includes an electrode 11 extending to the vicinity of the nozzle (see at least fig. 3).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

5. Claims 3-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kuriyama (JP11051391) in view of Chen (6,527,542). Kuriyama discloses substantially all of the claimed limitations but does not specifically recite the claimed hinge arrangement including ears and the positioning of the switch between the ears.

a. Chen teaches a cigarette lighter including a cover 20, head 58, and collar 5 including a hinge arrangement that utilizes ears (see at least fig. 2). Chen does not specifically discuss the ears as they are clearly old and well known in the art. Furthermore, this arrangement has no specific criticality other than mere design choice based on esthetic appeal. Accordingly, it would have been obvious to one of ordinary skill in the art at the time of the invention to incorporate the ear

arrangement taught by Chen on the collar and/or the cover of Kuriyama, so as to provide for the desired esthetic appeal.

b. As regards the placement of the switch between the ears, this is simply an extension of the desired appearance. As disclosed by Kuriyama, the placement of the switch is best located at the hinge holding the cover. Accordingly, the placement of the switch in an arrangement that utilizes ears would naturally extend to require that the placement thereof be therebetween. Accordingly, it would have been obvious to one of ordinary skill in the art at the time of the invention to place the switch between the ears, so as to provide for the desired esthetic appeal.

Allowable Subject Matter

6. Claim 10 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form **including all of the limitations of the base claim and any intervening claims.**

Prior Art

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hu and Ichikawa disclose lighters with many of the claimed components. Nevertheless, in order to avoid overburdening the applicant with redundant rejections, these references were not applied.
